

United States Unemployment 2020 during COVID-19 Pandemic

Introduction:

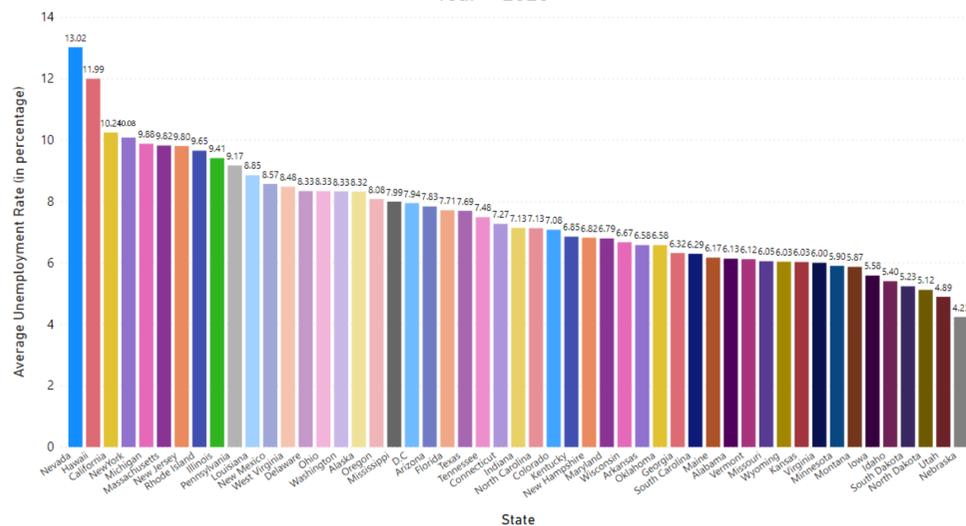

It has been a little over one year since the Covid-19 pandemic started. Covid – 19 affected jobs. I wanted to know what its impact was on employment in 2020. This poster explains the unemployment rates in various aspects (gender, age, race, etc.) during the Covid – 19 pandemic in 2020.

Data Collection Method:

To help me answer my question I created a question bank with the questions. I researched online. From the Bureau of Labor Statistics website, I searched, analyzed, and collected the data. I stored the data in a Microsoft Excel file and created charts to answer my question.

Unemployment Rate by State

Year = 2020

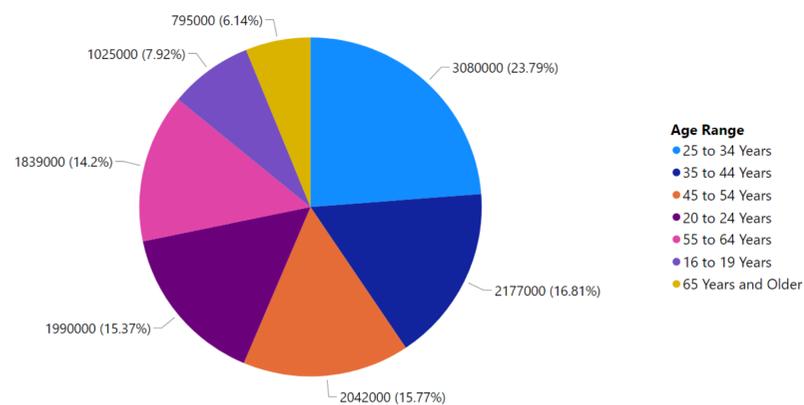

Industries Most Affected by Unemployment

Year = 2020

Industry	Unemployment Rate (in percentage)
Leisure and hospitality	19.40
Mining	11.30
Other services	9.80
Transportation	9.30
Construction	8.70
Retail Trade	8.30
Agriculture	8.10
Information	7.50
Manufacturing	6.80
Professional Services	6.70
Education and health services	5.70
Financial	3.80

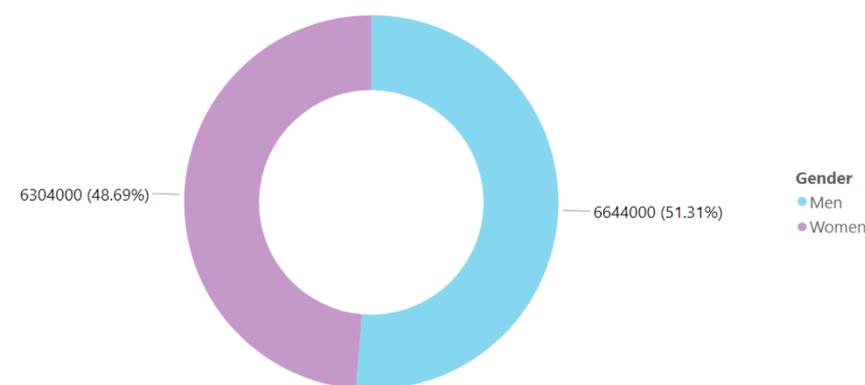

Unemployment Number by Age

Year = 2020

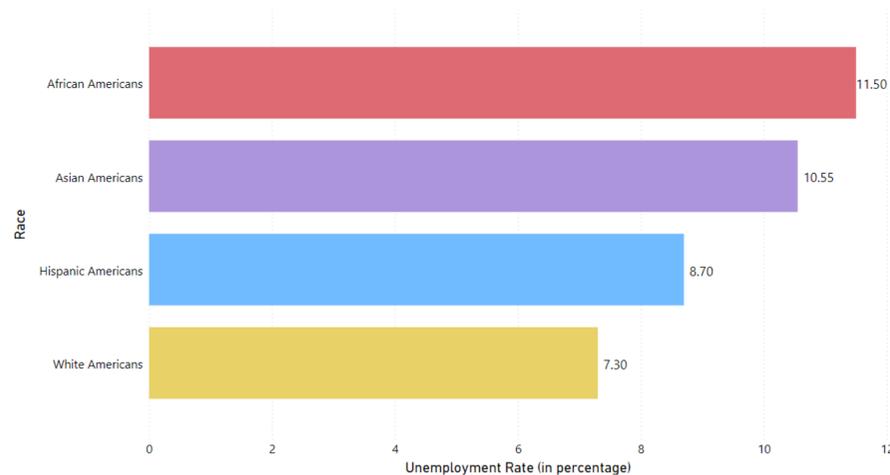

Unemployment Number by Gender

Year = 2020

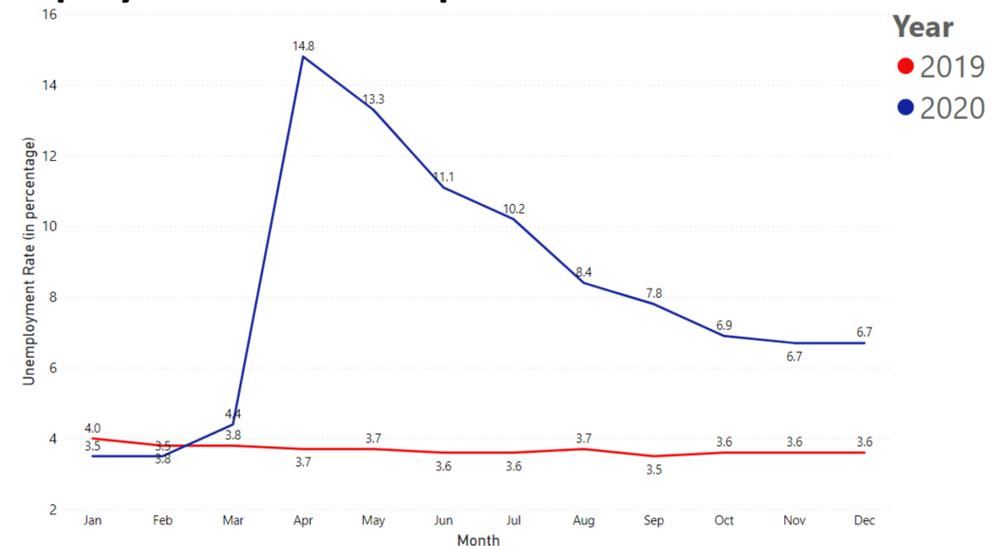

Unemployment Rate by Race

Year = 2020

Unemployment Rate Comparison 2019 and 2020

Conclusion:

From my statistical research and analysis, I can understand that the unemployment rates were higher in 2020 than 2019. I can infer Covid - 19 had a bigger impact on the American people's jobs, in 2020.
