Journal of the American Statistical Association, Applications and Case Studies Editor's Job Description

The American Statistical Association has invited nominations and applications for the position of Editor of the *Journal of the American Statistical Association*, (*JASA*) Applications and Case Studies (A&CS). The A&CS Editor also serves as Coordinating Editor and represents *JASA* on the ASA Committee on Publications.

Established in 1888 and published quarterly in March, June, September, and December, the *Journal of the American Statistical Association* (*JASA*) has long been considered the premier journal of statistical science. Articles focus on statistical applications, theory, and methods development in any area of science. Submissions on new statistical education methods and their assessment are also welcome. All submissions are rigorously refereed using a double-blind peer review process.

JASA publishes issues in March, June, September, and December; a one-year volume is typically 1800 pages. The A&CS section typically receives about 200 manuscripts a year.

There are three sections of *JASA*---Applications and Case Studies, Theory and Methods, and Reviews. A typical A&CS section contains 6-10 papers, a typical Theory and Methods section contains 25-30 papers, and Reviews consists largely of reviews of books and teaching materials, with an occasional review article.

The A&CS editor, working with the editorial coordinator, reviews new submissions and selects papers for review by Associate Editors. The A&CS editor selects papers for discussion in the A&CS section, including the annual JSM A&CS paper, and invites discussants for these papers. The editor also consults with the production editor to create each issue and ensure timely production and publication.

The A&CS Editor also acts as Coordinating Editor, working with the Editor(s) of the Theory and Methods section and the Reviews section, to ensure a correct balance of papers in each issue and to prepare short articles describing each issue's highlights. The A&CS Editor oversees work by the Associate Editors for Reproducibility to review code submitted with A&CS papers. The Coordinating Editor typically represents *JASA* on the ASA Committee on Publications.

The A&CS Editor receives significant assistance from the Editorial Coordinator, an independent contractor engaged by the ASA.

Editors are provided with an online manuscript submission and tracking system, and given training in the use of the system. The system allows the Editor to review papers and assign reviewers easily, as well as to generate reports.

The new editor will serve from 2025 through 2027, with the transition beginning in 2024.

JASA editors must be active ASA members during their terms.

Nominations should be sent to eric@amstat.org. Once received, nominations will be presented to the Chair of the *JASA* Editor search committee for further consideration. Interested individuals are encouraged to apply for the editorship.

The deadline for nominations is **January 26, 2024**.

Applicants should send a CV; the names of 3 references; and a letter of interest in the position including a brief statement of the candidate's vision for the publication, directions the candidate would pursue, and contributions she or he would make if selected as editor. Please send applications to eric@amstat.org.

The deadline for applications is **February 16, 2024**.

ASA always aspires to have a diverse set of editors, overall, and will ensure that all qualified and interested candidates receive a thorough and fair evaluation.

Journal of Business and Economic Statistics Joint Editors' Job Description

The American Statistical Association has invited nominations and applications for the positions of Joint Editors of the *Journal of Business and Economic Statistics*.

JBES publishes a range of articles, primarily applied statistical analyses of microeconomic, macroeconomic, forecasting, business, and finance related topics. More general papers in statistics, econometrics, computation, simulation, or graphics are also appropriate if they are immediately applicable to the journal's general topics of interest. Articles published in *JBES* contain significant results, high-quality methodological content, excellent exposition, and usually include a substantive empirical application. All submissions are rigorously refereed using a double-blind peer review process.

Due to a heavy submission load, *JBES* typically has two Editors who serve a concurrent term.

JBES receives about 600 submissions a year and publishes in January, April, July, and October.

The *JBES* Joint Editors, working with the editorial coordinator, review new submissions and select papers for review by referees. The Co-Editors also work with the production editor to create each issue and ensure timely production and publication.

The Joint Editors receive significant assistance from the Editorial Coordinator, an independent contractor engaged by the ASA.

Editors are provided with an online manuscript submission and tracking system, and given training in the use of the system. The system allows each Editor to review papers and assign reviewers easily, as well as to generate reports.

The Co-Editors represent *JBES* on the ASA's Committee on Publications.

The new Editors will serve from 2025 through 2027, with the transition beginning in 2024.

JBES Editors must be active ASA members during their terms.

Nominations should be sent to eric@amstat.org. Once received, nominations will be presented to the Chair of the *JBES* Joint Editor search committee for further consideration. Interested individuals are encouraged to apply for the editorship.

The deadline for nominations is **January 26, 2024**.

Applicants should send a CV; the names of 3 references; and a letter of interest in the position including a brief statement of the candidate's vision for the publication,

directions the candidate would pursue, and contributions she or he would make if selected as one of the Joint Editors. Please send applications to eric@amstat.org.

The deadline for applications is **February 16, 2024**.

ASA always aspires to have a diverse set of editors, overall, and will ensure that all qualified and interested candidates receive a thorough and fair evaluation.

Journal of Computational and Graphical Statistics Call for Co-Editor Nominations and Applications

The American Statistical Association and the Institute of Mathematical Statistics have invited nominations and applications for the positions of Co-Editors of the *Journal of Computational and Graphical Statistics*.

JCGS presents the very latest techniques on improving and extending the use of computational and graphical methods in statistics and data analysis. Established in 1992, this journal contains cutting-edge research, data, surveys, and more on numerical graphical displays and methods, and perception. Articles are written for readers who have a strong background in statistics but are not necessarily experts in computing.

The *JCGS* Co-Editors, working with the editorial coordinator, reviews new submissions and selects papers for review by referees. The editor also works with the production editor to create each issue and ensure timely production and publication.

The *JCGS* Co-Editors receive significant assistance from the Editorial Coordinator, an independent contractor engaged by the ASA.

The Co-Editors are provided with an online manuscript submission and tracking system, and given training in the use of the system. The system allows the Editors to review papers and assign reviewers easily, as well as to generate reports.

Papers submitted to *JCGS* are refereed using a single-blind review system, unless an author chooses a double-blind review.

JCGS editorial procedures and policies are established and reviewed by the *JCGS* Editorial Management Committee, of which the Editor is a member. The Chair of the *JCGS* Management Committee represents the journal on the ASA's Committee on Publications.

The Editor prepares short articles on each issue's highlights, which are published in *Amstat News* (either in print or online) and writes an annual Editor's Report, with assistance from the Editorial Coordinator if necessary.

The new editor will serve from 2025 through 2027, with the transition beginning in 2024.

JCGS editors must be active members of ASA or IMS during their terms.

Nominations should be sent to eric@amstat.org. Once received, nominations will be presented to the Chair of the *JCGS* Editor search committee for further consideration. Interested individuals are encouraged to apply for the editorship.

The deadline for nominations is **January 26, 2024**.

Applicants should send a CV; the names of 3 references; and a letter of interest in the position including a brief statement of the candidate's vision for the publication, directions the candidate would pursue, and contributions she or he would make if selected as editor. Please send applications to eric@amstat.org.

The deadline for applications is **February 16, 2024**.

ASA always aspires to have a diverse set of editors, overall, and will ensure that all qualified and interested candidates receive a thorough and fair evaluation.

JNPS Calls for Editor Applications and Nominations

The American Statistical Association and publisher Taylor and Francis invite nominations and applications for the position of editor of the *Journal of Nonparametric Statistics*.

JNPS provides a medium for the publication of research and survey work in nonparametric statistics and related areas. Both the theory and applications of nonparametric statistics are covered in the journal. Research applying nonparametric methods to medicine, engineering, technology, science and humanities is welcomed, provided the novelty and quality level are of the highest order.

For more information on *JNPS*'s aims and scope, please see <https://www.tandfonline.com/toc/gnst20/current>.

The new editor will serve from 2025 through 2027, with the transition beginning in 2024.

Nominations

If you know someone who would be right for the editorship of *JNPS*, please nominate that person by sending his or her name, email address, and a brief description of his or her qualifications to eric@amstat.org. The search committee will consider your nomination along with others received.

The deadline for nominations is **January 26, 2024**

Applications

Applications for the editorship should be sent electronically to eric@amstat.org, and should include a CV; the names of 3 references; and a letter of interest in the position including a brief statement of the candidate's vision for the publication, directions the candidate would pursue, and contributions she or he would make if selected as editor.

The deadline for applications is **February 16, 2024**.

Please note: *JNPS* editors are encouraged to be active members of the ASA during their terms.

ASA always aspires to have a diverse set of editors, overall, and will ensure that all qualified and interested candidates receive a thorough and fair evaluation.

JSDSE Calls for Editor Applications and Nominations

The American Statistical Association invites nominations and applications for the position of editor of the *Journal of Statistics and Data Science Education*.

JSDSE disseminates knowledge for the improvement of statistics and data science education at all levels, including elementary, secondary, post-secondary, post-graduate, continuing, and workplace education. It is online-only and, in accord with its broad focus, publishes articles that enhance the exchange of a diversity of interesting and useful information among educators, practitioners, and researchers around the world. The intended audience includes anyone who teaches statistics or data science, as well as those interested in research on statistical and probabilistic reasoning. All submissions are rigorously refereed using a double-blind peer review process

The new editor will serve from 2025 through 2027, with the transition beginning in 2024.

Nominations

If you know someone who would be right for the editorship of *JSDSE*, please nominate that person by sending their name, email address, and a brief description of their qualifications to eric@amstat.org. The search committee will consider your nomination along with others received.

The deadline for nominations is **January 26, 2024**

Applications

Applications for the editorship should be sent electronically to eric@amstat.org, and should include a CV; the names of 3 references; and a letter of interest in the position including a brief statement of the candidate's vision for the publication, directions the candidate would pursue, and contributions they would make if selected as editor.

The deadline for applications is **February 16, 2024**.

Please note: *JSDSE* editors must be active members of the ASA during their terms.

The *JSDSE* editor, working with the editorial coordinator, reviews new submissions and selects papers for review by referees. The editor also prepares new issues and writes decision letters.

JSDSE receives about 200 submissions a year and publishes four times a year.

The *JSDSE* Editor receives significant assistance from the Editorial Coordinator, an independent contractor engaged by the ASA.

ASA always aspires to have a diverse set of editors, overall, and will ensure that all qualified and interested candidates receive a thorough and fair evaluation.

***Statistics and Public Policy* Calls for Editor Applications and Nominations**

The American Statistical Association invites nominations and applications for the position of editor of *Statistics and Public Policy*.

Established in 2013 and produced electronically, *Statistics and Public Policy* (*SPP*) publishes papers that apply strong statistical methodology to problems in the realm of public policy and /or relevant political science. Articles may address international, national, or local policy questions, and the emphasis is upon the application rather than methodological novelty.

SPP is an open-access journal that publishes papers continuously. Articles appear in the journal shortly after they are accepted, in the order of acceptance.

The new editor will serve from 2025 through 2027, with the transition beginning in 2024.

Nominations

If you know someone who would be right for the editorship of *SPP*, please nominate that person by sending his or her name, email address, and a brief description of his or her qualifications to eric@amstat.org. The search committee will consider your nomination along with others received.

The deadline for nominations is **January 26, 2024**.

Applications

Applications for the editorship should be sent electronically to eric@amstat.org, and should include a CV; the names of 3 references; and a letter of interest in the position including a brief statement of the candidate's vision for the publication, directions the candidate would pursue, and contributions she or he would make if selected as editor.

The deadline for applications is **February 16, 2024**.

Editors are provided with an online manuscript submission and tracking system, and given training in the use of the system. The system allows the Editor to review papers and assign reviewers easily, as well as to generate reports. An Editorial Coordinator, contracted with ASA, assists the Editor.

Please note: *SPP* editors must be active members of the ASA during their terms. *All qualified candidates are encouraged to be nominated, especially those from previously underrepresented groups.*

Technometrics Calls for Editor Applications and Nominations

The American Statistical Association and the American Society for Quality invite nominations and applications for the position of editor of *Technometrics*.

Technometrics contributes to the development and use of statistical methods in physical, chemical, and engineering sciences as well as information sciences and technology. These include developments on the interface of statistics and computer science such as data mining, machine learning, large databases, and so on. The journal places a premium on clear communication among statisticians and practitioners of these sciences and an emphasis on the application of statistical concepts and methods to problems that occur in these fields.

The *Technometrics* Editor reviews new submissions and makes final decisions on which papers to accept for publication. The Editor appoints the editorial board and works with them to handle the journal's peer review process. Papers submitted to *Technometrics* are refereed using a rigorous double-blind review system.

The Editor prepares short articles on each issue's highlights, which are published in *Amstat News* (both in print or online) and writes an annual Editor's Report which is published in the journal.

The *Technometrics* Editor is provided with an online manuscript submission and tracking system and is given training in the use of the system. The system allows the Editor to review papers and assign reviewers easily, as well as to generate reports.

The Editor receives significant assistance from the Editorial Coordinator, an independent contractor engaged by the ASA. The Editor also works with the production editor to create each issue and ensure timely production and publication.

The Editor works with the *Technometrics* Management Committee, which oversees and guides the operation of the journal. The Chair of the Management Committee represents the journal on the ASA's Committee on Publications.

The new Editor will serve from 2026 through 2028, with the transition beginning in 2025. During that year, the incoming Editor will handle all new submissions to the journal.

Technometrics Editors should be active members of ASA and ASQ during their terms.

Applications and Nominations

Applications for the editorship should be sent electronically to the ASA Journals Manager, Eric Sampson (eric@amstat.org) and should include a CV; the names of 3 references; and a letter of interest in the position that includes a statement of the candidate's vision for the publication, directions the candidate would pursue, and contributions she or he would make if selected as Editor.

If you know someone who would be a good candidate for the editorship of *Technometrics*, please nominate that person by sending their name, email address, and a brief description of his or her qualifications to eric@amstat.org. The search committee will encourage promising nominees to apply for the editorship.

The deadline for applications is **December 15, 2023**. Nominations should be sent early enough to allow time for the candidate to submit his or her application.

JUQ Calls for Editor Applications and Nominations

The Society for Industrial and Applied Mathematics and The American Statistical Association invite nominations and applications for the position of editor of the *Journal of Uncertainty Quantification (JUQ)*.

JUQ publishes research articles presenting significant mathematical, statistical, algorithmic, and application advances in uncertainty quantification, defined as the interface of complex modeling of processes and data, especially characterizations of the uncertainties inherent in the use of such models. The journal also focuses on related fields such as sensitivity analysis, model validation, model calibration, data assimilation, and code verification. The journal also solicits papers describing new ideas that could lead to significant progress in methodology for uncertainty quantification as well as review articles on particular aspects. The journal is dedicated to nurturing synergistic interactions between the mathematical, statistical, computational, and applications communities involved in uncertainty quantification and related areas.

For more information on *JUQ*, please see <https://www.siam.org/publications/journals/siam-asa-journal-on-uncertainty-quantification-juq#Visualizer>.

For more information about *JUQ* or the specific duties of the Editor, please contact eric@amstat.org.

The new editor will serve from 2025 through 2027, with the transition beginning in 2024.

Nominations

If you know someone who would be right for the editorship of *JUQ*, please nominate that person by sending his or her name, email address, and a brief description of his or her qualifications to eric@amstat.org. The search committee will consider your nomination along with others received.

The deadline for nominations is **January 26, 2024**

Applications

Applications for the editorship should be sent electronically to eric@amstat.org, and should include a CV; the names of 3 references; and a letter of interest in the position including a brief statement of the candidate's vision for the publication, directions the candidate would pursue, and contributions she or he would make if selected as editor.

The deadline for applications is **February 16, 2024**.

Please note: *JUQ* editors are encouraged to be active members of the ASA during their terms.

ASA always aspires to have a diverse set of editors, overall, and will ensure that all qualified and interested candidates receive a thorough and fair evaluation.

Editor, *Journal of Survey Statistics and Methodology*
Term: 2025-2027
