

Does People's Favorite Song Match Their Favorite Genre?

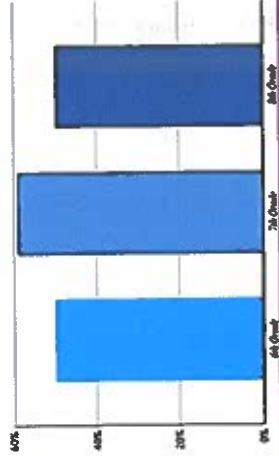

Hypothesis:

I'm guessing that people's favorite song won't necessarily match their favorite music genre.

SONG VS. GENRE

This Graph shows how many people's favorite song didn't match their favorite genre (percentage).

Observations:

- > The most popular MUSIC Genres are Pop (17), Hip-Hop (9), and Oldies (6).
- > The most popular SONG Genres are Pop (19), Alternative/Indie (7), and Indie Rock (6).
- > 59% of people's favorite song didn't match their favorite genre. I was surprised that the number was bigger than 50% because I thought that asking their favorite genre would give it away.
